

TEST AND MEASUREMENT

μOTDR Module™ Series
MU909014C/14C6/15C/15C6

Features

- Tri-wavelength OTDR for both installation and maintenance (1310 nm/1550 nm plus filtered 1650 nm or 1625 nm) in one unit
- Built-in PON Power Meter, Loss Test Set and Light Source functions
- High-end OTDR performance in a pocket-size package
- Exclusive, integrated launch fiber provides accurate initial connector measurement without external devices
- Excellent mid-range performance where it matters most
- "Fiber Visualizer" mode simplifies operation, no OTDR knowledge needed
- *Bluetooth*, Wi-Fi and Ethernet connectivity
- Complete PON testing through splitters up to 1 x 64
- High resolution and extremely short deadzones ensure thorough short fiber evaluation
- Rugged, sealed design provides years of service in the most challenging environments
- High resolution, widescreen color display that is easy to read indoors or out
- Modular platform ensures maximum return on investment
- Compact and lightweight design for maximum portability in the field
- High performance without a high price
